IMPROVING WORKING LIVES //

Bata Industrials® combines more than 100 years of experience with advanced materials and techniques. Using the latest insights into bio-mechanics, we continuously push the envelope of our capabilities with one single overriding goal: to guarantee the wearers of our shoes optimum safety, health and comfort.

This philosophy has won Bata Industrials® an outstanding reputation in the premium class of safety footwear. Safety remains a very important issue in the workplace, and today's workforce demands more from their footwear. They want extreme comfort from shoes that not only keep them safe but also look good. That's why Bata Industrials® is fully focused on the wearer experience and the perceptions of these men and women who wear our shoes. Every day their wishes and needs drive our efforts in research, development and design, driving our shoe design beyond current norms.

QUALITY+

Quality+ is a Bata Industrials® standard. It is our own method for guaranteeing the highest quality products and service levels. It goes beyond the accepted regional norms. This means that Bata Industrials® production, products and service remain at the highest levels.

TESTED

All our products are tested and certified beyond the regional norms. Our Quality+ level is among the highest in the industry.

PROCESS

Our manufacturing processes are kept efficient and up to date. Allowing for the fastest and highest quality footwear production around the world.

MATERIALS

We maintain the highest levels of quality by using the best materials, partners and suppliers. All our products carry a minimum 6 month guarantee.

SERVICE

Quality+ goes beyond producing the highest quality footwear. We offer the highest levels of service in the industry. We know that service levels must be as high the quality of our product.

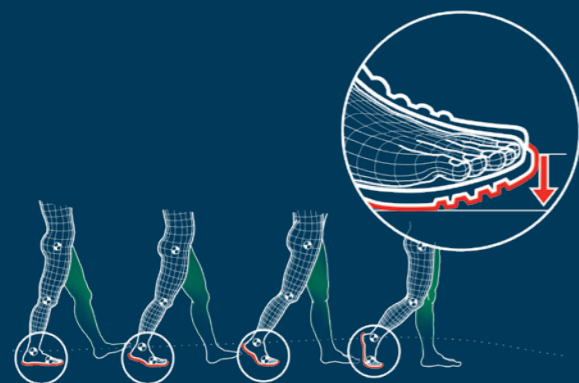

FEATURES //

- SIZE RANGE
- LADIES
- WATER RESISTANT
- OIL RESISTANT
- OIL & SOLVENT RESISTANT
- BLOOD & FAT RESISTANT
- TUNNELSYSTEM
- COMPOSITE TOECAP
- STEEL TOECAP
- STEEL MIDSOLE
- ANTISLIP
- ANTISLIP RATED SRC
- LIGHTWEIGHT
- HEAT RESISTANT
- REFLECTIVE FEATURES
- FLEX TESTED TO 500 000 CYCLES
- FULL GRAIN LEATHER UPPER
- EASILY CLEANABLE UPPERS
- FULL GRAIN CALF UPPERS
- PADDED INNERSOLE
- FLAT WEDGE SOLE
- HIGH GRIP SOLE

TECHNOLOGY +

At Bata Industrials® we have a number of advanced research and development departments. There, we combine the most advanced materials and techniques with the latest insights into biomechanics, allowing us to continually push the envelope of our capabilities. We do this with one single overriding goal: improving working lives by guaranteeing the wearers of our shoes optimum safety, health and comfort. This philosophy has won Bata Industrials® an outstanding reputation in the better class of safety footwear.

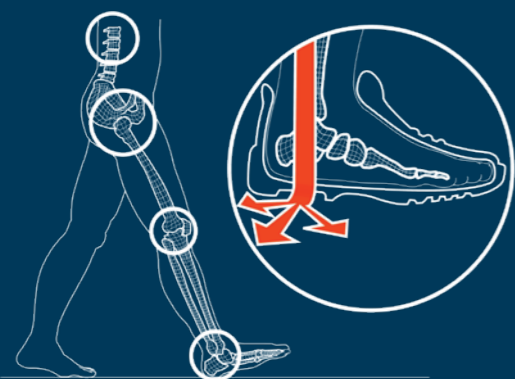

EASY ROLLING SYSTEM®

To prevent feet becoming tired, Bata Industrials devotes a lot of attention not only to the flexibility of the sole and the weight of the materials from which the shoe is made up, but also to the quality and shape of the foot bed. One of our latest findings in that area is the Easy Rolling System®, a subtle adaptation with major consequences. By pre-forming the front of the foot the natural motion of the foot is supported in an optimum way. The effect of this is energy saving and comfort increasing. It is details of this kind which make the difference on the work floor.

ANTISLIP SOLES

Selecting the most suitable sole type is dependent on the working surface, the degree to which this is polluted and the tasks someone has to perform. That is why Bata Industrials has developed several types of outer soles, each with its own profile. In order of slip resistance these are PU, which is above all light and flexible, TPU, which is antislip in all directions and TriTech Plus®, a sole manufactured using three densities of rubber, which is extra wear-resistant and offers maximum protection against slipping, shards, oils, acids and heat (to 300 degrees Centigrade). This means that we can provide the right grip on the work floor under all circumstances.

TUNNELSYSTEM®

Every collection of Bata Industrials has its own unique extras. However, there is one invention that sets every safety shoe from Bata Industrials apart: the ingenious Tunnelssystem®. This distinctive notch in the heel (the 'tunnel') deforms as the heel hits the ground and spreads the pressure over a larger surface area. What is unique about this system is that the wearer's weight has no effect on the function. The built-in shock absorber spares the joints and keeps the wearer upright. Spreading the load also gives the heel extra stability. This prevents fatigue and loss of concentration and hence avoids a great number of accidents.

LIGHT WEIGHT

In footwear design, safety and comfort are usually contradictory concepts. Bata Industrials shoes are developed on the basis of the common ground between these two features. Safe and sturdy, yet lightweight and comfortable. The shoes with higher specifications with rubber outsoles, destined for heavy work, are also relatively lightweight and comfortable.

ARRIVE IN STYLE

Bickz[®] RANGE

Bickz is a premier new range from Bata Industrials that combines the latest in style with the best in safety and comfort. Made with lightweight, composite stiffening materials, non-slip soles and an innovative tunnel system for preventing fatigue, by acting as a built in shock-absorber. These Bickz offer superior protection in a range of attractive, casual styles – perfect for managers in active work environments.

PERFORMANCE 894-4601

- > Upper: Leather, Crazy Horse
- > Sole: Nitrile Rubber Outsole, Phylon Midsole, TPU Stabilizer
- > Lining: Textile
- > Colours: Brown
- > Industry: General Purpose Industrial, Construction, Mining, Engineering.

BI707 859-2601

- > Upper: Suede Leather
- > Sole: Rubber Outsole, EVA Midsole, Non-woven insole
- > Lining: Bickz Cool System@-lining
- > Colours: Grey & Orange
- > Industry: General Purpose Industrial, Construction, Engineering.

BI710 804-6602

- > Upper: Action Leather
- > Sole: Rubber Outsole, EVA Midsole, Non-woven insole
- > Lining: Bickz Cool System@-lining
- > Colours: Black & Red
- > Industry: General Purpose Industrial, Construction, Engineering.

WORK TO PLAY

Bickz® RANGE

Bickz also offers a versatile range of hiking and running-style shoes to take from work to play. Each has a rubber outsole and cushioned phylon midsole for maximum comfort and flexibility, while a TPU stabiliser in the boot option allows for added multi-directional slip resistance. Incorporating a range of other safety options, these high-quality oil and solvent-resistant shoes are ideal for management who want to retain a professional image while keeping safety foremost.

BI 753 893-4403 (Brown)
893-6603 (Black)

- > Upper: Full Grain Leather
- > Sole: Nitrile Rubber Outsole, Phylon Midsole, TPU Stabilizer
- > Lining: Orange Mesh
- > Colours: Brown or Black
- > Industry: General Purpose Industrial, Construction, Agriculture, Engineering.

TRAIL 823-6503 (Yellow)
823-8603 (Red)

- > Upper: Microfibre/Mesh
- > Sole: Phylon Midsole, Nitrile Rubber Outsole
- > Lining: Textile
- > Colours: Black/Yellow or Black/Red

- > Sole: Phylon Midsole, Rubber Outsole
- > Lining: Textile
- > Colours: Black
- > Industry: General Purpose Industrial, Logistics, Warehousing.

MADE IN SOUTH AFRICA

Designed for South Africans, these are firm favourites among tradesmen looking for durable, comfortable and lightweight shoes. Because all of these shoes have a wider fit, making them a better choice for foot comfort. This range offers Bata Ventair® lining for maximum breathability, and a Dual Density polyurethane sole for superior flexibility and durability.

ATLANTIC 805-6604 (Black)
805-4404 (Brown)

- > Upper: Barton Leather
- > Sole: Dual Density PU
- > Lining: Bata Ventair® Lining
- > Colours: Black or Brown
- > Industry: General Purpose, Construction, Agriculture, Engineering.

PACIFIC 885-6604 (Black)

- > Colours: Black or Brown
- > Industry: General Purpose Industrial, Construction, Agriculture, Engineering.

CHELSEA 855-6604 (Black)
855-4404 (Brown)

- > Upper: Leather
- > Sole: Dual Density PU
- > Lining: Textile
- > Colours: Black or Brown
- > Industry: General Purpose Industrial, Construction, Agriculture, Automotive.

VERSATILITY AT WORK

Heat resistant up to 300°C, this range of safety boots is ideal for hot manufacturing and industrial environments. With a tough leather upper and rubber outsole, they are both oil and slip resistant.

Our imported Reflective range offers an alternative for general-purpose industrial, construction, agricultural and mining settings. The range includes a rugged leather boot with a polyurethane sole for general purposes, and a more streamlined option in leather/mesh, with a Bata Ventair® lining and Dual Density polyurethane sole that makes it ideal for hot mining conditions.

HEAT RESISTANT

ADVANCE 805-6605

- > Upper: Full Grain Leather
- > Sole: Polyurethane Midsole, Nitrile Rubber Outsole
- > Lining: Textile
- > Colours: Black
- > Industry: General Purpose Industrial, Construction, Agriculture, Mining.

TRUST 895-6605

- > Upper: Full Grain Leather
- > Sole: Polyurethane Midsole, Nitrile Rubber Outsole
- > Lining: Textile (Thinsulate)
- > Colours: Black
- > Industry: General Purpose Industrial, Construction, Agriculture, Mining.

REFLECTIVE

LIVERPOOL 885-6606

- > Upper: Leather
- > Sole: Polyurethane
- > Lining: Textile
- > Colours: Black
- > Industry: General Purpose Industrial, Construction, Agriculture, Mining.

CONGA II 804-6607

- > Upper: Leather/Mesh
- > Sole: Dual Density PU
- > Lining: Bata Ventair® Lining
- > Colours: Black
- > Industry: General Purpose Industrial, Construction, Agriculture, Mining.

CLASSIC SAFETY

The Sirocco offers a light, flexible polyurethane sole for optimum comfort. This multipurpose shoe is suitable for a variety of industries.

The Sabre range provides good, all-round safety features at an economical price point. Available in boot, shoe and Chelsea style, the Sabre range is suitable for many applications, from general industrial to agricultural and automotive.
