

BATA INDUSTRIALS

THE SAFETY SHOE

**THE
INTABA
COLLECTION** 

MADE FOR AFRICA.

Nestled within the picturesque landscape of Loskop, KwaZulu-Natal, stands the heart of Bata South Africa's legacy. Since 1977, this thriving factory has been more than just a hub, it's a testament to our commitment.

Our journey started by crafting specialised safety boots and shoes, meticulously designed to cater to the demands of mining and heavy industry domains. As time unfolded, Bata South Africa blossomed into one of the nation's big giants, proudly ranking among the top three producers of South African Bureau of Standards (SABS) approved safety footwear.

Our production success truly reflects the skill and dedication of our South African workforce. By localizing the manufacturing process, we not only boost our local and national economies but also provide unbeatable value to our customers across Africa.

Step into Bata Industrials Africa and experience the true essence of quality, tradition, and community. As we continue to make strides in the heart of Africa, we invite you to be a part of our journey.

THE INTABA COLLECTION

Introducing the Intaba premium collection work range - a modern and upgraded style that prioritizes both fit and comfortability. Crafted with cutting-edge technology, this collection is entirely metal-free, making it the ideal choice for a safe and efficient work environment.

Featuring a non-metal toe cap that provides exceptional protection against injuries, this range can withstand a force of up to 200 joules. For added security, the shoes are equipped with plastic eyelets and anti-nail penetration insoles. One of the significant advantages of wearing metal-free shoes is the ease of passing through metal detection gates swiftly and hassle-free, making it the perfect choice for various work settings.

Designed with advanced non-metal midsoles, these shoes effectively shield the feet from sharp objects that may try to penetrate through the sole. This superior work protection is further complemented by a slip-resistant PU outsole, ensuring excellent stability even in challenging environments.

To enhance comfort throughout the day, our shoes are designed with mesh and moisture-wicking textile linings, promoting a drier and more breathable environment. The shoes are also antistatic, antibacterial, anti-fungal, and breathable, ensuring a hygienic and comfortable fit.

Additionally, the removable metatomical PU footbed with comfort arch support offers long-lasting underfoot support, making it a pleasure to wear even during extended work hours.

Discover the Intaba premium collection work range - where style, safety, and comfort unite to provide an exceptional work shoe experience.

OUR INNOVATION.

With the Bata Industrials Intaba collection, you can trust that we've thoughtfully integrated innovative technologies into our work shoes, providing you with the highest level of safety, comfort, and performance, in order for you to tackle your work day with confidence and ease. Experience the difference today!

INTABA FEATURES.

Crazy Horse Genuine Leather

Crafted from premium Crazy Horse leather, our shoes exude both durability and a timeless appeal, ensuring they withstand the rigors of the workplace while looking stylish.

Anti-static

Our shoes are designed to be anti-static, providing peace of mind in sensitive work areas while ensuring a lightweight and comfortable fit.

Scotchlite Reflective Tape

For enhanced safety in low-lit work areas, our shoes feature Scotchlite reflective tape, ensuring high visibility to keep you seen and safe.

Dual-Density Outsole

This double layer outsole offers a balance between cushioning and stability.

Metal-Free

This non-conductive range lessens the risk of electrical hazards, and also allow for smooth and easy access through metal detector facilities.

200J Composite Toe Cap

Safety is paramount, which is why our shoes feature a 200J Composite Toe Cap that offers superior protection against potential impacts, keeping your feet safe throughout the day.

The Tunnelsystem®

A distinctive notch in the heel of the shoe that automatically adjusts as your heel hits the ground. By spreading the pressure over a larger surface area, this built-in shock absorber relieves stress on your joints.

Ballistic Textile Anti-Penetration Insole

With our advanced ballistic textile anti-penetration insole, you can confidently work in hazardous environments, knowing your feet are shielded from sharp objects.

Slip-resistant Outsole

Safety is further enhanced by our slip-resistant outsole, offering excellent traction and stability on various surfaces, reducing the risk of slips and falls.
